

## Professional Goals

During the past three weeks, I have learned many things. I am hoping that I will be able to apply what I have learned in my classroom. The principle of total immersion was cleverly and tactfully used in our daily practicum by all the teachers. The output of the students is beyond what we have expected. I am just amazed by this innovative method.

My short-term goal is to review my lesson plans from all levels and see how I can apply the five National Standards in particular the three Communicative modes. I would like to explore different resources for supplementary materials to support my students in the classroom. One of them is the many technology tools and websites several teachers shared with us. I would like to also redevelop the slides for my lessons to make it gradually 100% total immersion.

My long-term goal will be to return to work as a language consultant.
