

## **PROFESSIONAL GOALS**

**By Gloria Po**

**Having been a teacher in different subjects for a long time; I have always adjusted my teaching styles and methods in order to help my students to learn better. My first goal is to work on my curriculum for the next school year. I will try total immersion for all my classes starting next semester. I know it is hard, but I will definitely work on it. It's never too late to start trying.**

**Second, I will dedicate my time to design more performance based activities for my students. I will change my teaching style from teacher centered to student centered.**

**Third, I want to spend more time on creating songs for my students to learn Chinese. Music is my strengths; however, I have not applied it to my teaching at all.**

**Forth, I will keep attending teacher training and professional development programs. My weakness is that I don't know much about pedagogy. I will spend more time on studying it.**

**As for my long term goal, I plan to pursue my master degree in instructional technology. I have computer science background and I like to be a language teacher. It would be my dream job if I can teach technology in Chinese.**
