

Professional goals

“We made it!” It has been a very challenging and productive three weeks. I learned so much from Dr. Tseng, Lee laoshi , Zeng laoshi and my peers.

I appreciate the team work, the teaching experiences and the logical thinking from my fellow teachers. I believe it is possible to make our classes 100% immersion after this intensive training.

I will apply the technology I learned from Zeng laoshi to my classes. The cartoon (toondospaces) and the palm phone will be used in my classes . These will benefit my students who find character writing is challenging. I also will re-design my lessons, especially for my Mandarin II (9th grade) and Mandarin V (AP).

It certainly will take some time to get familiar with this teaching method. But I am happy that I find the way, a very promising way to make my teaching more effective.
