

## Professional Goals

Xiaojin Moore

For the next year I will continue to pursue my graduate degree in Second Language Education. I look forward to the field study experience in the Roanoke public school system. My long term goal is to become a good mandarin Chinese teacher, and to help start up Mandarin program in my local area public schools. Short term, I'll continue to develop the Chinese program in Blacksburg area through the Chinese School. This intensive course plus practicum provides me with much needed theory of best practices to guide our overall planning and management.
