

Professional Goals
Yuqing Yao

I am new to teaching in the public schools and I have a lot to learn. I have a lot to learn and to improve. In the next school year, I will be careful about scaffolding when I stay in the Target Language. Keep It Simple!

I will use task-based teaching methods in my classes. In order to do so, I will start to make a curriculum map, a monthly plan and a yearly plan according to my county curriculum.

Student-centered is the key. I will communicate with students when I introduce new vocabulary in class.

I will also keep a Best Practices Check List to record my own learning curve step by step, which will be of great help in reflecting and improving my teaching. I am hoping to bring Chinese language and culture to all my students.
