

Future Professional Goals

I will try to maximize (i+1) my students' language proficiency by input flood and pushed output, and cultural learning with more authentic materials, by designing a standards-based thematic curriculum, to have my students as the center of my classroom, and integrate language, content and cultural learning as the foundation. Set the goal of 90-100% usage of the target language in teaching, and transform the traditional fact tests to more performance based assessments.
