

Goal #: I believe classroom management is the key component in any educational setting, and learning can only take place when students are in a safe productive environment. I will research and learn strategies on how to engage every student in learning through academic challenging in diverse context, in addition to establishing classroom procedures and routines. The result of this practice is a classroom management plan.

Goal #2: In a world language class, comprehensible input is critical to help students understand the content and reach their proficiency goals. I am and will continue to apply scaffolding technique throughout the lesson and provide cases of evaluations on how this will help students to reach their language proficiency goals.
